

1SAFU LITE PAPER

INTRODUCTION

1SAFU is a utility token and a DeFi messaging service, which provides a platform that cater to most Crypto-currency limitations (the inability to perform multiple transactions at a time).

1SAFU will not only enable users to perform MULTIPLE TRANSACTIONS AT A TIME.

Other perks will also accompany this unique use.

What multiple transactions?

1SAFU will serve as a platform to send multiple SPL tokens and SPL NFT's ALL AT ONCE. 1SAFU as a DeFi messaging service also means that 1SAFU will enable users send messages or notes alongside this SPL tokens and/or NFT's all as a single transaction all in a pleasurable way that doesn't demand a prolonged process from its user's, friends will also be able send MEME messages alongside tokens (Which could be GIFTS) to one another, DON'T YOU JUST LOVE IT!?

Signing in for the first time would create an encrypted profile for the users

SOL/SPL wallet (public key) and could only be accessed with that particular SOL/SPL wallet's (private key) in the back end.

All major wallets such as sollet, phantom, coin98, slope, solflare etc will also be compatible.

As a committed project 1SAFU will journey through as the Road Map, with a BANG!!!

FIRST QUARTER (Q1 2022)

- ▶ Build our social channels
- ▶ Airdrop distribution
- ▶ Re-launch website and release Litepaper
- ▶ Add liquidity on Raydium
- ▶ List on CoinGecko and CoinMarketCap
- ▶ Rewards for 1SAFU holders
- ▶ Burn 99% of total supply

We have had a burn of 99.99% of our token to limit the total supply.

SECOND QUARTER (Q2 2022)

- ▶ Release Dapp (Beta)

A QUICK INSIGHT INTO OUR MARKET FIGURE
